| STARTER KIT | PX200ES | CORDLESS ELECTROSTATIC SPRAYER | 1 -2 Per School |
| STARTER KIT | PX30ES | REPLACEMENT TANK | |

TURNKEY INFECTION PREVENTION PROCESS

| DEFINITIONS | |
|---------------------|--|
| CLEANING | Physically removing all dirt and contamination, oftentimes using soap and water. The friction of cleaning removes most germs and exposes any remaining germs to the effects of a sanitizer or disinfectant used later. |
| SANITIZING | Reducing germs on inanimate surfaces to levels considered safe by public health codes or regulations. <i>Sanitizing may be appropriate for food service tables, high chairs, toys, and pacifiers.</i> |
| DISINFECTING | Destroying or inactivating most germs on any inanimate object, but not bacterial spores. Disinfecting may be appropriate for diaper tables, door and cabinet handles, toilets, and other bathroom surfaces. |
| DETERGENT | A cleaning agent that helps dissolve and remove dirt and grease from fabrics and surfaces. Soap can be considered a type of detergent. |
| DWELL TIME | The duration a surface must remain wet with a sanitizer/disinfectant to work effectively. |
| GERMS | Microscopic living things (such as bacteria, viruses, parasites and fungi) that cause disease. |

*Sanitizing/disinfecting solution with the Electrostatic Sprayer leaving a light air mist – let air dry.

| CLEANING, SANITIZING, AND DISINFECTING FREQUENCY TABLE | | | |
|--|---------------|-------------------------------|---------------------------------------|
| AREAS | CONCENTRATION | TABLET SIZE & QTY (PER QUART) | SCHEDULE |
| Desks, Countertops, Hands-on learning toys, toys | 100 ppm | (1) 334 mg | Daily |
